

About us

Eagle Flight Simulations is a new concept in entertainment for Corporate Events or Team Building options.

Our B737-800 simulator is totally mobile due to being housed in a fully self-contained 6m trailer. We are self-sufficient so we can come to you, your office or event venue.

Brian, a Flight Simulator enthusiast, has been "flying virtual airlines" for the past 5 years, and has a wealth of knowledge to share with budding "pilots".

The Simulator

The simulator is a full-scale, fully functional replica of a B737-800 cockpit and is like stepping onto a real flight-deck.

Offering varied and different options for Corporate Functions, or Team Building Exercises, we can customise a package suitable for your requirements. And the best part is we come to you, so no need to arrange travel.

From a complete novice to experienced pilots, our Flight Director will ably assist each person through all aspect of their experience, or he can set the simulator to give staff a real challenge. Your business can choose the length of the flights as well as select aspects, such as weather conditions, flying day or night, starting from first switch on, or at the start of the runway ready for take-off. You can choose different conditions and challenges for each staff member or group. Want to see how they handle new environments, stressful situations, or working together as they take on the roles of Captain and First Officer. Perhaps you simply want to reward staff for their efforts during the year with some fun flying.

All of this and at the best prices in Queensland so, come on book now and let us help you enjoy the experience.

Arranging a Corporate Function or event? Want something challenging and rewarding? Why not get us for the day.

We can tailor suit a package for you. The options are almost endless. We can be very flexible. Our fully air-conditioned Simulator could be the new idea you've been waiting to hear about.
